K = Boring distance

T = Door thickness

A = Minimum gap (A) for door with a door edge radius

L = Gap between door and panel

Note:

The minimum parameters in the reveal tables are based on doors with straight, square edges. A rounded or beveled profile will change the minimum reveal required.

Hinge Adjustment

Depth Adjustment

Rotate the hinge arm cam to increase or decrease door gap.

Horizontal Adjustment

Rotate the hinge arm screw to increase or decrease door overlay.

Vertical Adjustment

Adjust the mounting plate to increase or decrease the door height.

Note:

The referenced adjustment range described is the product design range. The actual design of the cabinet and the drilling method may have a certain impact on the parameters.
